

MAKE A SUSTAINABLE DIFFERENCE

Services from IMPACT for Sustainable Event

Food and Beverage Services

Choose quality ingredients, reduce waste and carbon footprint, and support the local economy

- Utilize reusable artificial plants, vegetables, fruits, and flowers
- Provide drinking water service points instead of individual servings
- Use glass instead of plastic bottles, or set up common water service points
- Food menus prepared with plant-based ingredients or whole grains
- Use ingredients from the local community, including seasonal fruits and vegetables
- Select vendors and service providers that support sustainable operations
- Reduce the use of one-time-use packaging by using environmentally friendly containers
- Set up signs to promote sustainable events
- Demonstrate clear intentions to reduce greenhouse gas emissions from transportation

Buildings and Places

Conserve energy

- Use standard energy-saving electrical equipment
- Utilize renewable energy sources, such as solar energy

Waste Management

Follow the correct and proper procedures

- Separate food and beverage waste so it can be repurposed or disposed of efficiently, such as by making fertilizer to improve soil quality
- Encourage customers to take leftover food home or donate it to those in need within the community

GREEN PACKAGE

Services from IMPACT for Sustainable Event

For organizing concerts

Promote environmental conservation

- Use environmentally friendly packaging, such as straws, paper cups, and food boxes

- Provide trash bins for separating waste, including recyclable waste, organic waste, and general waste

I agree to organize the events in a sustainable manner.
